Information on ingredients

Dear Madam, dear Sir,

Thank you for your inquiry. Please find below the requested information.

The below listed product has been checked regarding

Ingredient/s

Per- and polyfluoroalkyl substances (PFAS)

Product Name	Klüber-Art.No.	PFAS
Klübertemp GR UT 18 N	090221	PFPE-oil [CAS: 69991-67-9], amount: 60-70 %
		PTFE [CAS: 9002-84-0], amount: 30-40 %

Notes:

- Substances which are marked with „--“ in the table are not contained in the formulation of the corresponding technical product.
- Substances which are marked with „+“ in the table or which have a value are contained in the formulation of the corresponding technical product.

PTFE and PFPE are fluoropolymers with very high chemical and thermal stability. According to the CLP Regulation, PTFE and PFPE are not hazardous substances. PTFE and PFPE are chemically and biologically inert and due to their high molecular weight they cannot be absorbed by or accumulate in organism.

The presence of impurities, however, cannot be ruled out. Depending on the application, we would recommend consulting with us, if required. This declaration does not release the recipient from submitting the above-mentioned products to a suitability test and incoming inspection.

The information given in this document is based on our diligent data testing and corresponds to our state of knowledge at the time of issuing this document. This declaration is not automatically updated in case of changes in laws, standards or products.

Klüber Lubrication München GmbH & Co. KG
